

“Teléfonos de México informs about a resolution issued by the IFT”

Mexico City, Mexico, November 6, 2024 - Teléfonos de México, S.A.B. de C.V. (“TMX”) informs that on this date it has received a resolution issued by the Federal Telecommunications Institute (*Instituto Federal de Telecomunicaciones*, or “IFT”) related to its third “*biennia*” evaluation of the asymmetrical regulations imposed on March 2014 to Teléfonos de México, S.A.B. de C.V. (Telmex), and Teléfonos del Noroeste, S.A. de C.V. (Telnor), entities that are part of the denominated “preponderant economic agent” (*agente económico preponderante*) in the telecommunications sector.

The IFT resolution does not consider the profound changes in the Mexican telecommunications sector after more than ten years from the imposition of the asymmetric regulations and it is not supported by an integral evaluation of the competition that exists in each of the telecommunications markets of the sector. The asymmetrical measures obey to requests made by competitors that are not committed with the development of the Mexican telecommunications sector and that want to maintain IFT’s regulatory subsidies and privileges in order to substitute the productive investments necessary to compete effectively.

We will challenge the resolution in accordance with applicable law.

The resolution determines to modify and add new asymmetrical regulations, mainly consisting of the following in the fixed services:

- (i) *Services with characteristics that differ from those in the Reference Terms*: Upon request by an operator, wholesale services may be negotiated with terms different from those in the reference terms (*ofertas públicas de referencia*), as well as additional works, that shall be made available to the other operators on non-discriminatory basis.
- (ii) *Rates for sharing of passive infrastructure*: Rates applicable to the access and shared use of towers and/or sites will be freely determined and will be part of the reference terms (*oferta pública de referencia*) that the IFT will approve.
- (iii) *Dedicated-Links*: The obligation to provide new Time Division Multiplexing (TDM) dedicated-links to be eliminated on January 1, 2025.
- (iv) *Electronic Management System*: During a 2-year period, maintain available, for its review and download, all information generated and uploaded into the electronic management system used for the provision of wholesale services (*Sistema Electrónico de Gestión*), including logs.
- (v) *Public Tenders*: Provide to the IFT, periodically, certain information related to awarded public tenders with a contract amount above the threshold to be defined by the IFT.

This press release contains certain forward-looking statements that reflect the current views and/or expectations of TMX and its management with respect to its performance, business and future events. We use words such as “believe,” “anticipate,” “plan,” “expect,” “intend,” “target,” “estimate,” “project,” “predict,” “forecast,” “guideline,” “should” and other similar expressions to identify forward-looking statements, but they are not the only way we identify such statements.
